- Nicolò Mazzei (Componente dei genitori)
- Sara Di Girolamo (Componente degli alunni)

IL DIRIGENTE SCOLASTICO
Prof.ssa Lucia Assunta Ievolella

INSTITUTIONAL REVIEW BOARD

STUDY PROTOCOL

STUDY TITLE

The purpose of this study is to evaluate the effectiveness of a new intervention for the treatment of [disease/condition]. The study will involve a comparison between the new intervention and the standard of care.

OBJECTIVES

Primary Objective

To determine the efficacy of the new intervention compared to the standard of care.

Secondary Objectives

To assess the safety and tolerability of the new intervention.

To evaluate the quality of life of participants in the study.

To determine the cost-effectiveness of the new intervention.

DESIGN AND METHODS

This study is a randomized, controlled trial. Participants will be randomly assigned to either the new intervention group or the standard of care group.

The study will be conducted in a single-blind manner, meaning that the participants will not know which group they are in.

The study will be conducted in a multi-center setting, with participants recruited from various hospitals and clinics.

The study will be conducted in accordance with the principles of the Declaration of Helsinki.

The study will be conducted in accordance with the principles of the Belmont Report.

The study will be conducted in accordance with the principles of the Common Rule.
